

Name: _____

Multiplying Decimals

You are in charge of dinner tonight. Below is a list of prices for the grocery store around the corner. Use multiplication to solve the following problems. (You do not need to calculate taxes at this point in time).

Steak 4.99/lb.

Mac and cheese .89

Chicken 1.99/lb.

Brownie mix 1.49

Oatmeal 2.19

Milk 3.89

Apple juice 2.79

Mayonnaise 1.99

1. How much would it cost to buy 7 packs of mac and cheese?
2. How much would it cost to buy 9 boxes of brownie mix?
3. How much would it cost to buy 4.3 pounds of chicken?

4. How much would it cost to buy 5.2 pounds of steak?

5. How much would it cost to buy 3 jugs of apple juice and 8.2 pounds of chicken?

6. How much would it cost to buy 3.4 pounds of chicken and 2 packs of brownie mix?

7. Jessica has \$20 from her dad to buy 2 jugs of milk, 1 mayonnaise, and 2.6 lbs of steak. How much would it cost her? Does she have enough money? If yes, how much money does she have left? If no, how much more would she need?
