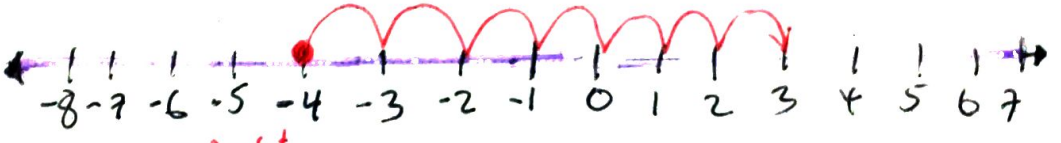
Modelling Integers w/ Number Lines (Adding)

Sept 11, 2023

Steps:

1.) Draw an appropriate number line
   - Look at your first term and second term to judge your distance
2.) Start w/ first term (first #)
3.) Jump with the second term
   - (+) jump to the right (forward)
   - (-) jump to the left (backwards)



*Right

$(-4) + (+7) = +3$

↑ First Term *start*

↑ Second Term

↑ # of jumps
